Re: Sanitary Survey of the Town of Readsboro Water System a Public Community Water System located in Readsboro VT, WSID #5028

Dear Mr. Marchegiani,

A sanitary survey of the Town of Readsboro Water System (Water System) was conducted on October 28, 2015. Rob Farley represented the Vermont Department of Environmental Conservation, Drinking Water and Groundwater Protection Division (Division) and Mitchell Holland, water system operator, represented the Water System. The Water System was issued a Permit to Operate (PTO) on May 24, 2013. The PTO does not have an expiration date, although the PTO will be amended by this Division as deemed necessary over time.

The Water System is in excellent condition without a single deficiency identified. All deficiencies identified in the last survey and in the PTO compliance schedule have been corrected. The Division appreciates the Water System diligence in addressing the sanitary deficiencies identified through the Division's survey and permit programs.

I appreciated Mitchell's time during the sanitary survey of the Town of Readsboro Water System. If you have any questions or would like to discuss anything in this survey report, please contact me at the address above, by phone at 802-371-7616 or email rob.farley@vermont.gov.

Sincerely

A handwritten signature in black ink, appearing to read "R. Farley".

Robert G. Farley,
Water System Specialist
