VARIANCES

In accordance with the Readsboro Zoning Bylaw, the Development Review Board may grant Variances from provisions of a zoning regulation for a structure if findings of fact are found and they are specified in the Development Review Board's decision. The findings of fact are listed below and applicants are expected to address each point at the hearing before the Development Review Board.

Findings of Facts: *(for structures that are not primarily a renewable energy resource structures)*

1. That there are unique physical circumstances or conditions, including irregularity, narrowness or shallowness of lot size or shape, or exceptional topographical or other physical conditions peculiar to the particular property, and that unnecessary hardship is due to such conditions, and not the circumstances or conditions generally created by the provisions of the Zoning Bylaw in the neighborhood or district in which the property is located, AND
2. That because of such physical circumstances or conditions, there is no possibility that the property can be developed in strict conformity with the provisions of the Zoning Bylaw and that the authorization or Variance is therefore necessary to enable the reasonable use of the property, AND
3. That the unnecessary hardship has not been created by the appellant, AND
4. That the Variance, if authorized, will not alter the essential character of the neighborhood or district in which the property is located, substantially or permanently impair the appropriate use or development of adjacent property, reduce access to renewable energy resources, or be detrimental to the public welfare, AND
5. That the Variance, if authorized, will represent the minimum variance that will afford relief and will represent the least deviation possible from the Zoning Bylaw and from the Town Plan.

Findings of Facts: *(for structures that are primarily a renewable energy resource structures)*

1. It is unusually difficult or unduly expensive for the appellant to build a suitable renewable energy resource structure in conformance with the regulations; and
2. The hardship was not created by the appellant; and
3. That the variance, if authorized, will not alter the essential character of the neighborhood or district in which the property is located, substantially or permanently impair the appropriate use or development of adjacent property, reduce access to renewable energy resources, nor be detrimental to the public welfare;
4. That the variance, if authorized, will represent the minimum variance that will afford relief and will represent the least deviation possible from the zoning regulation and from the plan.
